

Mains-Fed Water Cooler  
Countertop

# Aquablu REFILL+

Functional drinks, without single-use plastic packaging.

The REFILL+ provides high quality filtered tap water - cooled and sparkling - enriched with flavors, vitamins and electrolytes.

- Patented CleanFlow technology removes 99.99% of contaminants from tap water.
- Filters out chlorine, micro-plastics, heavy metals and PFAS.
- UVC LED in dispensing nozzle ensures hygienic dispensing and avoids backward contamination.
- Available with or without cabinet or splashback.

# Product features and benefits

## Planet friendly

Save the planet from plastic packaging while avoiding the hassle of storage. Limit CO2 emissions caused by transportation.

A monthly Impact Report shines a light on your contribution and helps you celebrate your own impact.

## Boost productivity

Research suggests that hydrating keeps employees focused throughout the day, boosting productivity by as much as 14%.

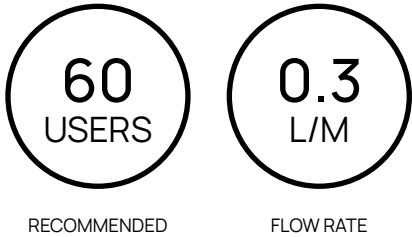

86% of office workers don't stay sufficiently hydrated. Research shows that productivity can increase by up to 14% when we're well hydrated.

## Remote support and self-service

2G-4G connection to online dashboard for automatic replacement reminders and remote support.

Users can replace modules independently through a visual guide in the service menu on the machine.

## Healthy & delicious

Water can be boring, yet soft drinks are unhealthy.

Combining the best of both worlds, creates a healthy yet delicious drink you can't get enough of. Enjoy water with zero sugar which is enhanced with electrolyses and added vitamins.

With additional customisations in water temperature and flavor intensity, you can create 39 different drinks from just one outlet.

Choose from four delicious flavours:

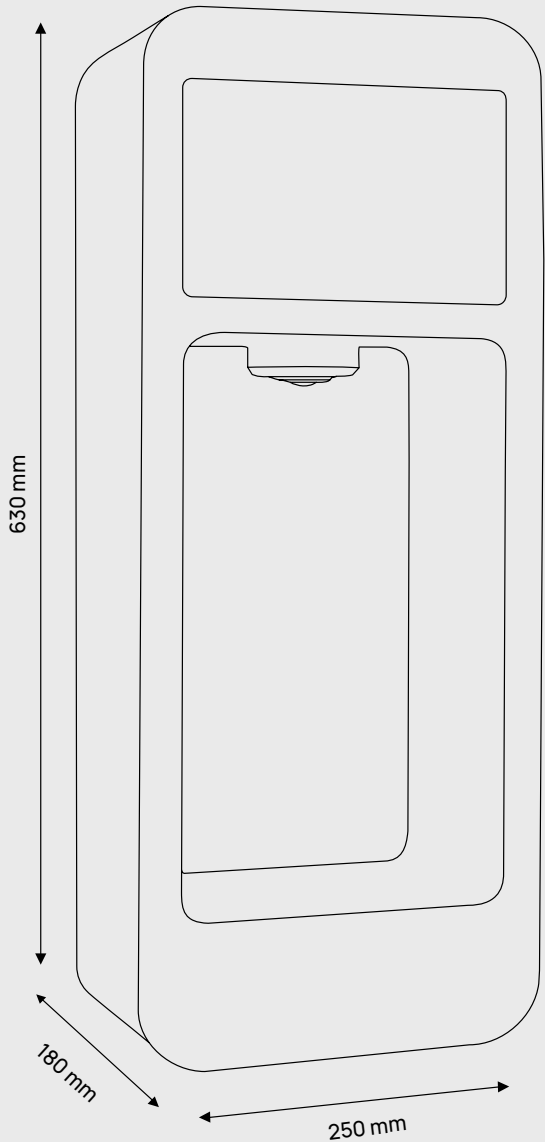

- Immunity - Fresh Lemon
- Focus - Red Fruit
- Unwind - Mango Guava
- Balance - Raspberry Pomegranate

99.99%

Patented CleanFlow technology removes 99.99% of contaminants from tap water

## Technical specifications

## Water options

Ambient	Cold	Sparkling	Hot	Extra hot
				

## Specifications

Model	REFILL+
Dimensions W x H x D	250mm x 630mm x 180mm
Variants	Still, Chilled or Sparkling
Weight	12 Kg
Internal waste	No
External waste	No

## Technology and performance

Water purification system	CleanFlow technology
Cooling capacity	45L/hour
Dispensing capacity (flow rate - Ltrs/min)	0.3

## Installations requirements

Water supply	Water outlet (drain) or a smart jerrycan
Mains waste	Not required
Ventilation	An air gap of 100mm is required
