

Bottle Filling Station
Wall Mounted

meetpat Permanent

Ideal for workplaces, schools, and public spaces,
ensuring continuous access to water.

- Hassle-free installation for continuous access to refreshing, filtered drinking water.
- Reliable and high-quality hydration solution for workplaces and public spaces.
- Touch-free dispensing for added convenience and adaptability in any environment.

Product features and benefits

Built to last in any busy environment

Suitable for indoor and outdoor placement.

Durable materials are designed to withstand the elements, and rigorous testing has proven a high level of durability.

High-quality design ensures long-term quality and performance, even in challenging outdoor conditions.

No electrical connection required. Just place, connect to a water source, and the unit is ready to go.

Brand and customise

Transform your space with a branded water station. Customise it to showcase your brand or offer valuable information, creating a standout feature in any location.

Graphics are made from polycarbonate panels with anti-graffiti protection.

FLOW RATE

Accessible hydration

Continuous, accessibility compliant hydration for the public.

It becomes a reliable fixture, promoting hydration and serving as an essential community resource for all.

Touchless technology ensuring hygienic hydration for all users.
