

Wall-Mounted Manual Bottle Refill Stations and Fountains

Versatile, robust unit perfect for public buildings, gyms, hospitals, schools, and offices.

- Chilled and ambient options available
- Freshield® Antimicrobial Treatment for added hygiene.
- Intuitive design is easy to use and maintain

Product features and benefits

Sustainable hydration

The shallow basin is designed to eliminate splashing and standing water, ensuring a smooth delivery of water.

The bubbler valve has also been designed to be eco-friendly by reducing waste water by 50%.

Hygienic unit for busy environments

One piece, tamper proof water saver flex bubbler, with Freshield®.

Freshield® protection utilises a silver-based antimicrobial compound ensures perfect hygiene, combating bacteria, fungus, and odours.

The built-in 100 micron strainer prevents any particles from contaminating the water before it enters the waterway, ensuring that users are provided with the purest water they can receive.

FLOW RATE

Intuitive design that's easy to use

This bottle filling station is manually activated with a push of one of the four push pads, delivering ambient water easily.

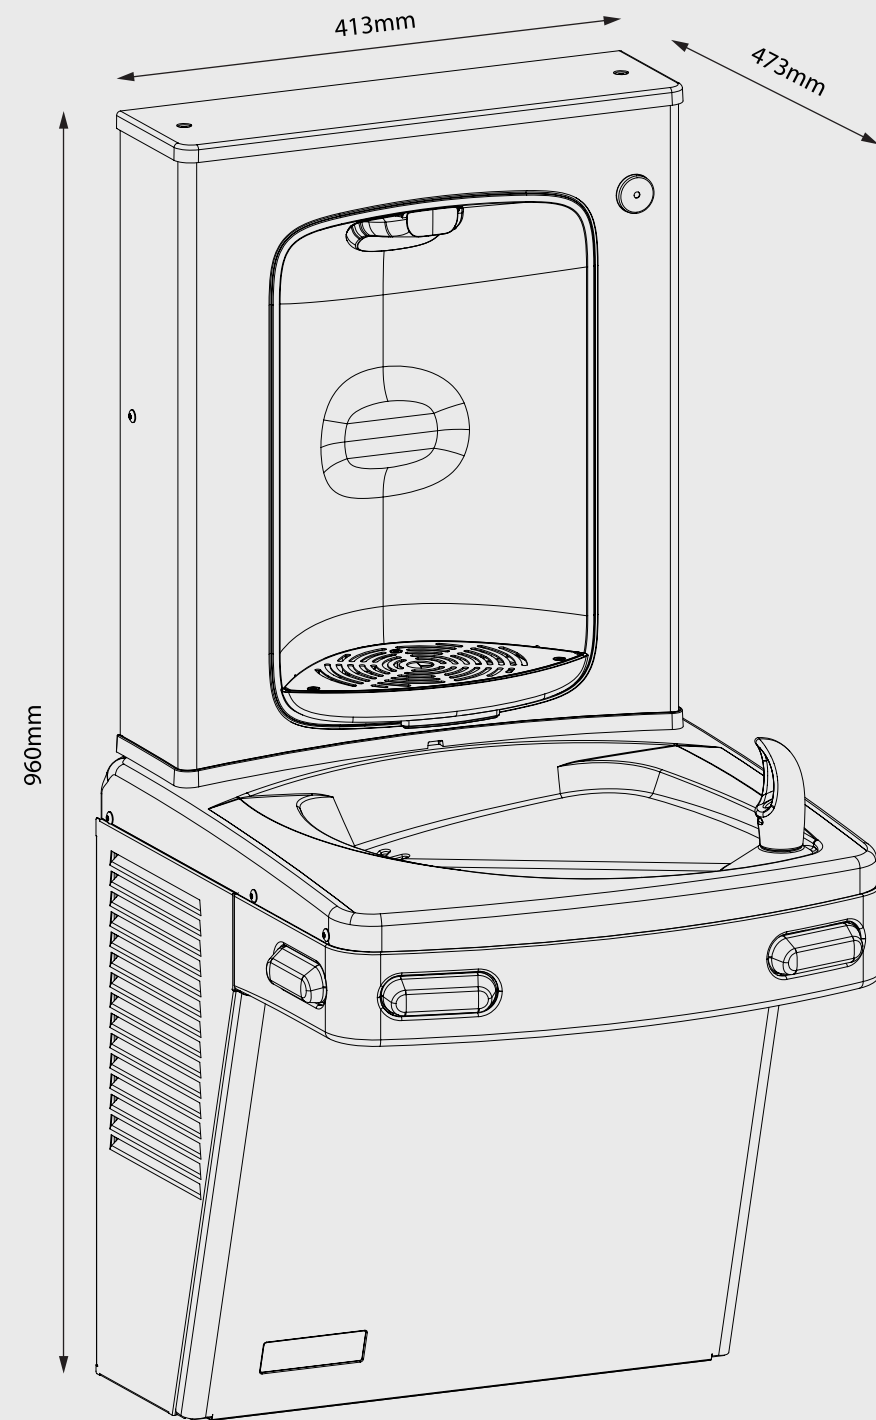

It has a robust stainless steel finish making it easy to wipe-down and maintain. It also has a removable front for service and maintenance convenience.

These units offer a large dispensing space, which is suitable for a variety of bottle filling requirements for users on the go.
